

**SSDIS-6000 (SOLID STATE HARD DRIVE DISINTEGRATOR)**  
CE APPROVED

According to the **NSA/CSS 9-12 Storage Device Sanitization Manual**, a recommended method of sanitizing classified data that appears on Solid State Drives is to **“Disintegrate into particles that are nominally 2 millimeter edge length in size”**. Using a Sizing screen that is less than 2 mm, the Model **SSDIS-6000** is a unique self-contained system that shreds SSD devices into non re-constructible fragments. For even greater throughput when “Classified Destruction” is not required, larger particle size screens are available. The system has everything you need to begin destroying SSD’s quickly, easily and safely. The configuration includes a **dual stage** cutting system for maximum performance.

**Disintegrates Solid State Drives – Pen Drives – Smart Phones – PCB’s to DIN Standard E5 (high security)**

**NOTE:** All phone batteries, including those from sealed phones like iPhones, **must be removed before disintegration process.**

**Dimensions:** cm 86.36 D x 135 W x 125 H  
**Weight:** 998 Kilos

**NOTE:**  
Customer responsible to determine if power capacitors or batteries need to be removed from SSDs prior to disintegration.

System intended for SSD drives and devices only. Rotational Hard Drives or other related device destruction will void warranty.

<b>Capacity</b>	<b>200+ SSD Enterprise Drives and/or Devices per hour using 5mm screen or 500 devices of mixed SSD devices including USB’s, smart phones, SD cards</b>
<b>Shred Size</b>	<b>Screen sizes 5mm or 2 mm</b>
<b>Power</b>	<b>5 hp / 3-Phase at 208V (30 amp), 230 V (20 amp) or 460V ( 15 amp)</b>
<b>Feed Opening</b>	<b>3.8cm h x 21.6cm w</b>
<b>Waste Collection</b>	<b>Internal Bin – 13.5 Liters</b>
<b>Warranty</b>	<b>1 yr Parts / 90 day Labour</b>

**Options:**

- Spare Knives
- Spare Screens
- Spare Collection Bin
- Replacement Filters
- Maintenance Contract
- Installation
